

MAQAM KIDS APP - FEATURES OVERVIEW

This document summarizes the main features currently available in the app.

1) LANDING EXPERIENCE

- Welcome landing screen with branded visual identity.
- Clear call-to-action to enter the app.
- Family-friendly look and feel focused on children.

2) PROFILE PICKER (LOGIN STYLE)

- Multi-profile child selection before entering the app.
- Three profile types by age band:
 - 3-6 years
 - 7-10 years
 - 11+ years
- Profile avatars and basic labels shown in the picker.

3) AGE-BASED LEARNING PATHS

- The home screen content is dynamically adapted by selected age group.

For ages 3-6:

- Coloring activities.
- Story Reader with simpler story complexity.
- Basic math learning.
- Arabic alphabet/letters learning.
- Daily wisdom messages.

For ages 7-10:

- Map game challenges.
- National stories.
- "What happened today in history" section.
- More advanced math activities.
- English learning path (replacing alphabet path).
- Daily wisdom messages.

For ages 11+:

- More complex map challenges.
- Deeper/advanced story reading.
- More analytical history content.
- Advanced math direction.
- English skills focus.
- Daily wisdom messages.

4) HOME DASHBOARD

- Personalized welcome using selected profile name.
- Quick-access cards for all available sections.
- Dynamic section visibility/content based on age profile.
- Daily challenge card to drive engagement.
- Stats widgets (points, collected heroes, streak display).

5) INTERACTIVE MAP GAME

- Algeria map-based progression system.
- Region selection with lock/unlock behavior.
- Region levels displayed as a path (4 levels per region).
- Level completion tracking and local persistence.
- Reward flow includes collectible hero card reveal.
- Character/hero album progress integration.

6) LEVEL VIDEO EXPERIENCE

- Region video popup with in-app video player.
- Current configured story video source:
assets/STORIES/IMG_9697.MOV

- Native video controls for playback.

7) QUIZZES AND ADAPTIVE QUESTION DIFFICULTY

- Multiple question sets in game levels.
- First-level question set includes November 1 history topic.
- Question complexity adapts by age:
 - 3-6: simple understanding questions
 - 7-10: medium level comprehension
 - 11+: deeper historical interpretation

8) STORIES MODULE

- Story cards with date, title, duration, and pages.
- Two reading modes:
 - Read mode (manual paging)
 - Listen mode (narration-style controls)
- In-story AI-style Q&A modal for child questions.
- Story text complexity adapted by age profile.

9) TODAY IN HISTORY

- Date-based automatic historical event selection.
- Fallback event if no exact date match.
- Kid-friendly presentation in Arabic UI.
- Different complexity layers by age profile.

10) DAILY WISDOM

- Rotating motivational and values-based messages.
- Family/kid tone encouraging discipline, kindness, and learning.

11) MATH SECTION

- Game grid model with sample playable interaction.
- Difficulty framing updated by age band.
- Premium-lock style cards for selected games.

12) LANGUAGE SECTION (SPELL / ENGLISH TRACK)

- For younger kids: alphabet and early spelling style content.
- For older groups: English-focused learning framing.

13) COLORING SECTION

- Dedicated coloring activity area for creative learning.

14) ALBUM AND COLLECTIBLES

- Hero/character album with discovered and hidden cards.
- Progress reflects unlocked map achievements.

15) PERSISTENCE AND STATE

- Uses local storage for key user progress:
 - active profile
 - map progress
 - collected cards
- Preserves progress across sessions on the same device.

16) UI/UX STYLE

- RTL-friendly Arabic interface layout.
- Child-friendly colors, icons, animations, and large buttons.
- Responsive card/grid patterns for content navigation.

17) PREMIUM/PAYWALL FLOW (IN-APP MOCK STRUCTURE)

- Locked premium cards in learning sections.
- Unlock modal with feature list and pricing-style presentation.
- Premium state toggle available in app flow.
